

### **Talk the way you want**

You run a one-of-a-kind business so you need a one-of-a-kind business voice system. Whether your employees are in a single location or multiple sites, desk-bound or road-bound, take inbound calls or make outbound calls, Allworx can create a perfect fit.

### **All-in-one approach**

We create solutions that are ready to work out of the box. Every Allworx system comes loaded with advanced VoIP features including voicemail-to-email, presence settings with customized call routes, auto attendants, and many more – at no additional cost.

### **Enterprise-grade features at an SMB price**

SMBs require a robust feature set but few can afford a big price tag. A typical Allworx deployment costs only a few dollars per month per employee over the lifetime of the phone system.<sup>1</sup>

### **Complex technology made simple**

You don't need to be a tech whiz to manage an Allworx system. Allworx offers four access levels for the web-based system administration site so anyone can make simple adds, moves, and changes, whenever and wherever.

### **Tried. True. Tested.**

Allworx systems have been installed at more than 45,000 business sites.<sup>2</sup> But our product innovation is never done. We continually release software upgrades to enhance the existing features and add new ones based on real customer feedback.

1. Based on a sample deployment using an Allworx® Connect™ 731 system with 45 Allworx IP phones and several popular advanced software options, and assuming a seven-year usage.

2. As of September 2015.
